**11. Why did you choose this project/why did you choose to go to the internship?**

Because I want to expand my comfort zone and I want to have an experience to teach other person that not my acquaintance in here, but new acquaintance or even new friend in there. I want to feel as a teacher even though I'm not a real teacher, but I will learn to be a good teacher.

## 12. Write a message to your future students and host families

Dear my host family,

Hello! My name is Rahmadini Fitria Nanda, you can call me Adin, I'm 18 years old girl. I come from a family that consist of three older siblings, they are Mitra, Lisda, and Taufik, our parents called Tandanan and Nanny and they are working as an Entrepreneur and Teacher. I lived in Jakarta but currently I'm studying in Diponegoro University, Semarang, majoring in environmental engineering and I really like my study! It was such a great opportunity to come and do an amazing thing that I do now, being a volunteer for an education project in Zlin, Czech Republic. This project means so much to me, because this is going to be my second time abroad without my family, after my culture exchange in Turkey. This is a great opportunity to know another family with new habits and also meet many new friends, learn new languages and cultures.

I like to read old novel, photography, editing film and I want to explore sport activity in Czech Republic because I'm so interested with football even though I'm an amateur in that. I love traditional dance too, because when I was 16 years old I come to Turkey for cultural exchange and I performed Indonesia traditional dance. The traditional dance was called Saman, it came from Aceh.

I love children so much, I always played with my neighbors when they were 5-10 years old. We always played together, like play football or playing in a playground together. I loved children so much because they're so funny and it makes me happy. We studied together, like learning English and Indonesian language too. So, that's why I choose this project.

I'm an easygoing people, so I would like to explore Czech Republic and I want to try all new things that I never got on my country. In my own house, I can't cook but I'm willing to learn how to cook especially Czech Republic's local food. I'm so excited about new things that I will get from my host family, from the new habit, language, culture, even new friends!

I'm very excited about my new experience that will come and I'm waiting good news from you!

Dear my future students!

Welcome to this classroom and I'm overjoyed that you are too. I had so many sleepless nights getting through the planning of this class days over days. I hope you are as excited as I am about being here.

I hope that as your teacher I will not fail you. I have a lot of new ideas that some of them I believe will work. Trust me, I have a lot of ideas, I will encourage you to explore your strength, weakness, creativity and critical thinking skill. I want you guys to teach me things as well, for example, teach me how to be a better teacher.

I also want you to grow as a student and as a person. I want to help you to discover different cultures and break the stereotype that you might know or even just guessing of other nationalities. There is so much out there that needs to be discovered and I want you guys to have the best opportunity out there, I encourage to get out of your comfort zone and try new things. Who knows? You may find the benefit in there.

### 13. Allergies, diets

I don't eat pork.
